Q1) List 7-M resources for entrepreneur.

1. Money

2. Manpower

3. Materials

4. Machinery

5. Market

6. Management

7. Model

Q2) Write down start up india scheme.

1) Self certification for labour
2) Tax-benifits
3) Fund of funds for startup
4) Credit guarantee scheme for startup
5) Startup india seed fund scheme

The Startup India scheme (launched 2016) is a government initiative to boost innovation and job creation by supporting startups with funding, tax relief, and simpler regulations.

📝 Eligibility

· Entity: Private Limited, Partnership, or LLP.

· Age: < 10 years from incorporation.

· Turnover: < ₹100 crore every year since incorporation.

· Core: Must work on innovation, development, or a scalable business model.

🚀 Key Benefits

· Funding: ₹10,000 crore Fund of Funds for investment via AIFs.

· Tax: 3-year tax holiday (Section 80IAC) and Angel Tax exemption (Section 56).

· IPR: 80% rebate on patent filing and fast-track examination.

· Compliance: Self-certification for 9 labour & environment laws.

· Tenders: Exemption from "prior experience" criteria for government tenders.

📲 How to Apply

Apply online via the Startup India portal:

1. Register and fill in business details.

2. Upload Certificate of Incorporation and PAN.

3. Submit a write-up on your innovative business model.

4. Self-certify compliance and submit for DPIIT approval.

Q3) Explain MSMEs.and write down its objective.

MSMEs stands for Micro, Small and Medium Enterprises. These are businesses mainly classified by their investment in plant and machinery or equipment and annual turnover. In India, MSMEs form the backbone of the economy because they generate large scale employment, promote entrepreneurship, support industrial output, and contribute significantly to exports. They operate in manufacturing, services, and trade, usually with limited capital but high economic impact. MSMEs are regulated and supported by the Ministry of Micro, Small and Medium Enterprises.

Objectives of MSMEs

To promote self employment and entrepreneurship, especially among youth and rural populations.

To generate large scale employment with relatively low capital investment.

To support balanced regional development by encouraging industries in rural and backward areas.

To increase industrial production and exports, strengthening the national economy.

To encourage innovation and skill development at the grassroots level.

To reduce economic inequality by distributing income and industrial growth more evenly.

Q4) Explain Function and Characteristic of Entrepreneurship.

Functions of Entrepreneurship

Innovation – Introducing new or improved products and methods.

Risk Bearing – Taking financial and market risks.

Organization of Resources – Combining land, labor, capital, and technology.

Decision Making – Making key business decisions under uncertainty.

Employment Generation – Creating jobs and income.

Characteristics of Entrepreneurship

Innovative – Based on new ideas or improvements.

Risk Oriented – Involves uncertainty and risk.

Profit Motivated – Profit is the reward for risk and innovation.

Dynamic – Adapts to market and environmental changes.

Economic Activity – Contributes to economic growth.

Q5) Differentiate between Entrepreneurship And Intrapreneurship.

Basis	Entrepreneurship	Intrapreneurship
Meaning	Starting and running a **new independent business**	Innovation done **within an existing organization**
Ownership	Entrepreneur **owns** the business	Intrapreneur **does not own** the business
Risk	Bears **full financial and business risk**	**Low personal risk**; risk borne by the organization
Investment	Uses **own or borrowed capital**	Uses **company resources**
Decision Making	**Independent** decision making	Decisions limited by **organizational policies**
Rewards	Profit and growth belong to the entrepreneur	Salary, incentives, promotions
Failure Impact	Personal financial loss	Minimal personal loss

Q6) Define Industry, Commerce and Business.

Industry

Industry refers to activities involved in the **extraction, production, processing, or manufacturing of goods** from raw materials to finished or semi finished products.

Commerce

Commerce includes all activities that **facilitate the distribution of goods** from producers to consumers, such as **trade, transport, warehousing, banking, insurance, and advertising**.

Business

Business means all **economic activities carried out regularly** with the **objective of earning profit**, including **industry and commerce**.

Q7) Explain any two types of business ownership.

1. Sole Proprietorship

A sole proprietorship is a business owned and controlled by one person. The owner provides capital, manages operations, bears all risks, and receives all profits. It is easy to start, has no separate legal entity, and the owner has unlimited liability, meaning personal assets are at risk if the business fails.

2. Partnership

A partnership is a business owned by two or more persons who agree to share profits, losses, and responsibilities as per a partnership agreement. Capital and skills are pooled, management is shared, and liability is generally unlimited and joint among partners.

Q8) Difference between Private company and Public company.

Basis	Private Company	Public Company
Definition	Company owned by a **small group of members**	Company owned by the **general public**
Minimum Members	2	7
Maximum Members	200	No limit
Share Transfer	**Restricted**	**Freely transferable**
Public Invitation	Cannot invite public to buy shares	Can invite public through **prospectus**
Capital Requirement	Lower capital	Higher capital
Disclosure Rules	Fewer legal formalities	Strict legal formalities
Management	Controlled by a few people	Managed by a board with public accountability

Q9) Enlist various leadership models and Explain Democratic leadership in detail

Leadership Models

Autocratic Leadership

Democratic Leadership

Transactional Leadership

Transformational Leadership

Democratic leadership is a leadership style in which the leader involves group members in decision making while retaining final authority. Employees are encouraged to share ideas, give suggestions, and participate in problem solving. Communication flows both upward and downward, which improves transparency and trust. This style increases employee motivation, creativity, and job satisfaction because individuals feel valued. Democratic leadership is effective in organizations where teamwork, innovation, and skilled employees are important, though it can be slow in emergencies due to consultation and discussion.

Q10) How to calculate ROI & ROS.

ROI (Return on Investment)

What it measures:
How efficiently money invested is generating profit.

Formula:
ROI = (Net Profit ÷ Investment Cost) × 100

Steps:

1. Find net profit = Total returns − Total investment
2. Divide net profit by investment cost
3. Multiply by 100 to get percentage

ROS (Return on Sales)

What it measures:

How much profit a business makes from its sales. It shows operating efficiency.

Formula:

ROS = (Operating Profit ÷ Net Sales) × 100

Steps:

Take operating profit

Divide by net sales

Multiply by 100

Q11)What is Project Planning & write down steps involved in Project planning

Process.

Project Planning

Project Planning is the systematic process of deciding in advance what work has to be done, how it will be done, when it will be done, who will do it, and what resources are required to complete a project within given time, cost, and quality constraints.

Steps Involved in Project Planning Process

Define Project Objectives

Clearly state what the project must achieve. Unclear objectives guarantee failure.

Identify Project Scope

Decide what is included and what is excluded. Scope creep happens when this step is weak.

Break Project into Activities (WBS)

Divide the project into smaller, manageable tasks.

Estimate Time for Activities

Determine how long each activity will take.

Estimate Cost and Resources

Calculate manpower, materials, equipment, and budget required.

Schedule Activities

Arrange tasks in proper sequence using charts or networks.

Risk Identification and Planning

Identify possible risks and plan preventive actions.

Monitoring and Control Plan

Decide how progress, cost, and quality will be tracked and controlled.

Q12) show the significance of techanical analysis in feasibility study.

Significance of Technical Analysis in Feasibility Study

Technical analysis in a feasibility study examines whether a project is technically possible and practical with available technology and resources.

Significance:

Selection of Appropriate Technology

Ensures the technology chosen is suitable, proven, and not unrealistic.

Assessment of Resource Availability

Confirms availability of raw materials, machinery, manpower, and utilities.

Determination of Plant Location and Layout

Helps select an efficient location and optimal layout to reduce cost and delays.

Capacity Planning

Determines optimal production capacity to avoid underutilization or overload.

Estimation of Technical Costs

Provides accurate estimates of machinery, installation, and operating costs.

Identification of Technical Risks

Detects risks related to technology failure, obsolescence, or maintenance issues.

Ensures Operational Efficiency

Confirms that the project can run smoothly and meet quality standards.

Q13) Explain the characteristic of Corporate social responsibility.

Characteristics of Corporate Social Responsibility (CSR)

Voluntary in Nature

CSR goes beyond legal requirements. Companies choose to act responsibly, not because they are forced.

Concern for Society and Environment

Focuses on social welfare, environmental protection, and sustainable development.

Ethical Behaviour

Requires honesty, transparency, and fairness in business operations.

Stakeholder Oriented

Considers interests of all stakeholders employees, customers, suppliers, community, and government not just shareholders.

Long-Term Orientation

Aims at long-term social and business benefits, not short-term profit.

Integration with Business Operations

CSR is embedded into business policies and decision-making, not treated as charity.

Accountability and Transparency

Companies are responsible for their social actions and disclose CSR activities
